A Museum Escape Odyssey

Tuesday

BREAKING NEWS:

Shibuya Museum Suspected of Housing a Yokai

In a whimsical journey of art and hilarity, the renowned actor Aiko Nakamura's exaggerated performances led her to an unfortunate fate. While admiring the Shibuya museum's paintings, she transformed into a mischievous Yokai, capable of possessing paintings, turning a prestigious museum into a comedy performance.

Three quirky exorcists, seasoned in the supernatural (and known for their peculiar tactics), were hired to investigate the theatrics. Working for competitive wages, they geared up for an adventure through the museum, determined to unravel Aiko's story and bring an end to her sidesplitting reign.

As they navigated the dual realms of the museum, the exorcists sought to break the curse binding Aiko to the night dimension. The amusing mystery behind Aiko's transformation unfolds in this lighthearted tale of acting and the supernatural. Get ready for a board game filled with ghostly gags, spectral slapstick, and a whole lot of exorcist absurdity!

Game Components

Game Board (x1), Exorcist Role Cards (x3),
Exorcist Player Tokens (x3), Yokai Role Card (x1),
Yokai Player Token (x1), Charge Orbs (x12),
6-Sided Dice (x1), 30-Second Timer (x1),
Action Cards (x35), Word Bank (x30)

Game Objective

Yokai

- Corrupt **one** room by staying undiscovered in a room for **two** cycle (a cycle ends after all three exorcists have taken their turn).
- After **two** cycles, the Yokai relocates the room's painting to the **reflecting room** on the Day side, indicating corruption.

Exorcists

- Discover the Yokai **twice** to win.
- Movement is determined by one die roll; movement is only vertical and horizontal.
- Complete tasks (e.g., Act Out! or Two Truths and a Lie) in rooms to unlock the number of rooms they can reveal on the **Night** side of the museum.

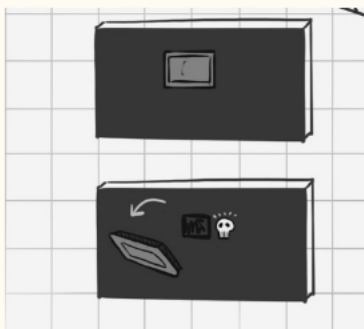

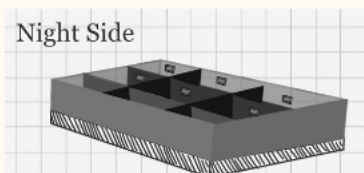

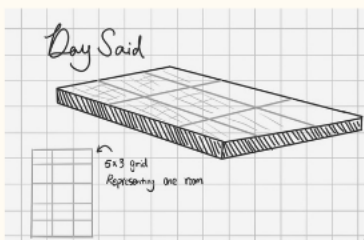

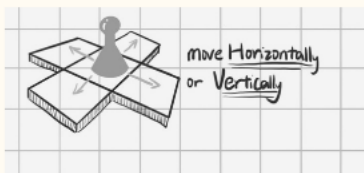

- Exorcists cannot know which rooms other Exorcists have checked.
- Collect **one** "charge" orb to activate abilities to assist in competing with fellow Exorcists and discovering the Yokai.

Setup

1. Distribute role cards randomly.
2. Place the Word Bank deck face down near the Yokai player.
3. Place the Action Card deck near the Exorcists.
4. Exorcists close their eyes; Yokai hides the Yokai token under a painting on the **Night** side.
5. Yokai places the charge orbs on the Day side at their discretion.
6. Exorcists hold on to their player tokens until their first turn.

Gameplay

1. The oldest exorcist player starts, followed by turns in clockwise order.
2. Exorcists roll the dice for movement, and they can only move horizontally and vertically.
3. After moving, draw one card from the Action Card deck.
 - a. If the player draws an Act Out! card, the player draws a card from the Word Bank, then shows it to the Yokai to act it out.
 - i. If the Yokai does not act out the card, they will lose one life. If the Yokai doesn't know how to act out the card, they can switch it out with another card in the Word Bank. They can only do this twice each cycle.
 - b. If the player draws a Two Truths and a Lie card, flip the card and read and answer each prompt based on your own experiences. The Yokai has to guess the lie.
4. The Exorcist who completes an Action Card chooses which rooms to check based on the tile's number.
 - a. If the tile is labeled as "2" the player chooses two rooms to check.
 - b. If the tile is empty, the player chooses one room to check.

The yokai takes off the painting from the wall to hide the token.

Gameplay

- When the Exorcist turns to the Nightside to check rooms, the other Exorcists close their eyes.
- To activate abilities, the Exorcists must collect one charge orb of their corresponding color.
- After collecting one charge orb, you can decide to activate your ability or obtain more orbs and save them for future plays. (You can only use your ability **once** every cycle.)
- The next Exorcist rolls the dice and this process continues for the remaining Exorcists.
- After all three Exorcists have finished their turn without discovering the Yokai's hidden location, the Yokai will corrupt the room they are currently hiding in, and move to another room. **This concludes one cycle.**

When Found by Exorcists

- Immediately after the discovery, Yokai loses a life, then can hide in any other room without the Exorcists looking.
 - After hiding, Exorcists continue to the next player.

Abilities

Exorcists

- NAONIN:** Can learn which rooms the previous Exorcist checked (only revealed to Naonin).
- SHORI:** Steals another Exorcist's chance to guess rooms after they complete their Action.
- YUTSU:** Can steal and instantly activate another Exorcist's ability.

Yokai

- Has **two** lives.
- Swap: Able to swap **two** charge orb's location.
 - Can be used once per cycle.

Win Condition

Yokai: Wins by corrupting **one** room.

Exorcist: Wins by reducing Yokai's lives to **zero** by discovering it.
